#### Form Enhancements

This month, ACORD released several forms with new features and enhancements.

**Note:** These are *not* new forms editions. The forms have not changed, nor have any fields been added or removed. The enhancements involve forms use and include:

- Field Parsing: Data fields such as Address are now separated into component parts (street, city, state, zip), to allow for more precise data capture and more accurate transmission.
- Improved FIGs: ACORD's Forms Instruction Guides are integrated into the forms to provide specific help for each field on screen, and are consistent across all forms.
- Each field is assigned a unique e-label
