100+ Countries Served

9,000,000 Annual ACORD message transactions

2,000,000 ACORD forms downloaded since 2010

6,000 ACORD regulatory submissions to date

LETTER FROM THE CEO

When I became CEO of ACORD in 2016, my colleagues and I began a process of thoughtful, impactful change. Throughout the change process, we have remained focused on fulfilling ACORD's core promise: addressing the needs of our members.

Throughout 2018, we saw the early results of this change effort. This year was largely dedicated to refining and perfecting our newly enhanced processes, approaches, and assets. We restructured our standards development SOPs to reflect our more nimble and transparent SDO model. We added 86 new members, including many in our newly offered programs. We utilized our expanded research capabilities to produce over 20 reports, studies, articles and thought leadership initiatives.

However, we remain mindful of our duty to our members and will not become complacent. In 2018, we not only consolidated and leveraged recent improvements but also undertook several initiatives to extend the reach and impact of ACORD.

Through an agreement with Lloyd's, we provided access to ACORD Standards to thousands of coverholders, doubling our number of participating organizations worldwide.

We accepted donations of an unprecedented number of assets from industry contributors, to be incorporated into evolving cyber standards and the ACORD Digital Standards.

We increased our visibility in media and the industry through hundreds of millions of impressions, presentations to hundreds of firms over all three major geographies, and ACORD-authored articles in leading industry publications.

We greatly expanded our service to the Australia / New Zealand market, through extended Delegated Authority Standards coverage, new membership offerings for the superannuation industry, and the first ACORD Digital Standards API.

We formed new Standards Project Groups for Digital Standards and Distributed Ledger Technology, engaging industry leaders to guide the development of these emerging technologies.

In 2018, we leveraged the results of ongoing change and extended our community's reach. As we continue these efforts in 2019, we will be driven by execution, results, and most of all value – to you, our members.

Sincerely,

A handwritten signature in black ink, appearing to read 'Bill Pieroni'.

Bill Pieroni
President and CEO, ACORD

INSIDE ACORD 13

STANDARDS & MEMBERSHIP

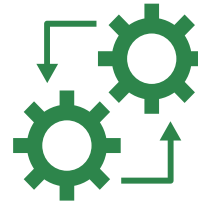

Membership

In 2018, ACORD welcomed 86 new members across 20 programs, as well as many new subscribers to our individual assets. This year we launched multiple programs to make our assets more accessible to a broader audience, including the Delegated Authority Program for Lloyd's Coverholders, the Superannuation Fund Membership, and the UK Solution Providers Pilot Program.

We also significantly enhanced our educational assets, based on an extensive occupational analysis completed the previous year. We revised and updated the ACE exam specifications for all three major domains, including the creation of brand-new content areas. We also made our training resources available as a free benefit to all ACORD members.

ACORD's leadership continued to visit our members to learn firsthand their issues, concerns, and goals – and how ACORD can help. In the coming year, these insights will drive progress across all business areas, as we focus our efforts on meeting the needs of our members.

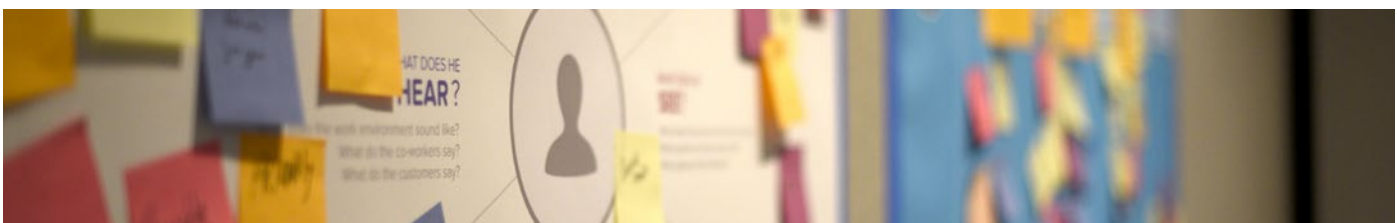

Standards Development

ACORD continued to reduce the cost and time required to support the standards development process in 2018. The implementation of new, streamlined processes enabled us to accelerate pace, improve business alignment, and extend assets into new areas. One primary guiding principle was to optimize channels for member engagement with the ACORD Standards through agile, transparent mechanisms.

Key partnerships and asset donations from industry-leading organizations also enabled us to build Standards more efficiently in 2018. Partners such as Aon, Beazley, The Hartford, MetLife, and Nationwide all contributed assets to the ACORD community, which are being utilized in the development of new cyber standards, the ACORD Digital Standards, and more.

We also launched new Standards Project Groups this year for Digital Standards and Blockchain. As the industry explores the potential of new technologies, ACORD member organizations have an opportunity to join these Project Groups and contribute to improvements in business capabilities across the insurance value chain.

Property & Casualty

This year saw the development of the industry's first standard and business glossary for Global Cyber Data Breach, enabled by collaboration with Aon and Beazley, key stakeholders in the cyber market.

Other additional capabilities were built into the ACORD P&C XML Standard to support 464 new LMTOM data requirements for over a dozen classes of business, in support of LMTOM's continued effort towards facilitating fast, accurate data exchange in the London Market and throughout the world. These classes of business include Livestock, Marine Hull, Yachts, Pleasure Craft, Accident & Health, Cargo, Cyber, Financial Lines, Product Recall, Auto, Claims and Premium Reporting.

This year's releases also saw the addition of 31 IICMVA data requirements mapped to the XML Standards, supporting the insurance industry and Motor Vehicle Departments in the US and Canada.

In total, 97 Standards Enhancement requests resulted in 1,464 changes to the P&C XML standards in 2018, while AL3 Standards releases included 63 standard enhancements resulting in 2,055 changes. The changes ranged from new codes, data elements, and coverages to updated guides and documentation. In addition, there were two CSIO P&C XML releases, comprising 92 standard enhancement requests resulting in 164 updates.

Life & Annuity

The L&A community completed work on several major initiatives in 2018, and transitioned its work efforts to align with the revised Standard Operating Procedures. The Employee Benefits Implementation Community also concluded its efforts upon the final release of the Employee Benefits Member Enrollment Standard. The L&A Program Advisory Council approved two new Standards Project Groups (Standards Enhancement Review and Life Inforce Product), as well as two Advisory Groups (Architecture and ACORD DTCC Mapping).

The L&A community unanimously approved 51 Standards Enhancements affecting both the XML and EDI Standards this year, covering four release cycles.

Moving forward, we will continue to offer Standards Product Groups that focus on industry priorities. We will continue to improve inforce processing for life products, and to work collaboratively with our industry partners. We will also be participating in the cross-domain Digital Standards initiatives, and look forward to creating new efficiencies for our L&A members through these emerging technologies.

Global Reinsurance & Large Commercial

GRLC moved to the new ACORD governance framework this year, in order to maintain efficient member participation by ACORD members at all levels of the SDO process. A total of 25 Standards Enhancement requests were approved through our enhanced, agile workflow.

Focus remained on implementation in 2018, with global message volumes continuing to increase significantly. ACORD continued to support GRLC implementers redeveloping their systems in line with the newest version of the standards (Version 2016-10); early implementers are now live on this version, and most of the others aim to have fully migrated with all partners by mid-2019. As a result, ACORD has enhanced its Test Harness facilities to include extended test scenarios, significantly reducing the requirement for individual organizations to duplicate tests with every messaging partner as they migrate between versions.

In 2019, we will continue to promote increased usage of the GRLC XML Standards, while also addressing new technologies such as Digital Standards. We will work proactively with new implementation initiatives in the London Market and global GRLC community in order to fully leverage emerging technologies, increased interoperability, and the potential for more efficient data exchange.

Asia-Pacific

In 2018, we built additional capability into the ACORD Asia-Pacific General Insurance XML Standard to support reporting of risk, premium and claims into the London market, allowing regional underwriters to both place business and report using just one Standard. Additional classes of business were also added, including Commercial Marine Hull & Cargo, Accident & Health, Agriculture (Livestock and Bloodstock), and Financial Lines such as Bankers Blanket Bond.

The Australia & New Zealand Life Standard continued to grow its reach, with its adoption by one of Australia's largest life insurers, as well as our new Superannuation Fund members. A number of interim releases were published throughout 2018 to support 22 distinct enhancements, including new messages for Illustration, New Business Close (Settle), Endorsement Quotation & Close (Settle), Policy Inquiry, Claims Inquiry & Synchronisation, and Claims & Premium Bordereaux.

The major releases of both the Asia-Pac GI and AU/NZ Life Standards saw the addition of the first API specification for Claim Lodgement, thanks to assets donated by MetLife. The Program Advisory Committees have endorsed building out further API support throughout 2019, with an initial focus on claims management.

Southern Africa

The current version (2.4.1) of the AML Standard was published in May 2018. Eight Standards Enhancements have been approved by the community for the next version, with more currently being defined as the community looks to scope and build out further requirements for Commercial Lines, as well as adding additional classes of business to align with the Delegated Authority Reporting Standard. The coming year will see a focus on the enhancing and implementation of the Commercial Policy Sync message, and on Digital Standards.

Workers' Compensation

ACORD released a new major version of the Workers' Compensation Reporting XML Standard in July 2018. It includes changes to the existing Claims messages and also includes three new messages for Proof of Coverage. This release was based on the IAABC EDI Proof of Coverage Release 3.0 and Claims Release 3.1; there were about 73 IAIA BC data changes, resulting in 22 Standards Enhancement requests and 110 XML changes.

There is an interest in promoting Workers' Compensation XML to jurisdictions/reporters that are modernizing systems, as it offers a more flexible and economical option over flat file/batch (EDI) reporting. Some states are making XML reporting voluntary, while other states are planning to mandate the use of XML.

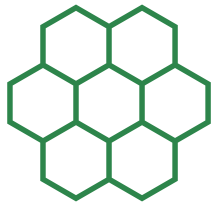

Delegated Authority

July 2018 saw the publication of Version 1.2.0 of the Delegated Authority Reporting Standard, supporting a whole new range of risk classes for reporting into the London Market by MGAs & Lloyd's coverholders around the world. This was the largest single AML Standards release ever undertaken, with 40 Standards Enhancements resulting in 4,757 distinct additions, supporting Agriculture, Accident & Health, Marine Hull, Cargo, Cyber Breach, Term Life, Legal Expenses, Bankers Blanket Bond, Directors & Officers, Extended Warranty, Medical Malpractice, Product Recall, Professional Indemnity, and Motor.

This release was only possible through continued close collaboration between the ACORD, LMTOM, and Lloyd's communities over the last 18 months. The coming year will see implementation of this release more widely by the London Community in the new DA SATS environment, supported by LIMOSS.

This year also saw the launch of the Delegated Authority Standards Coverholder Program. Through an arrangement between ACORD and Lloyd's, all Lloyd's coverholders are eligible to subscribe to the DA Standards free of charge.

Reference Architecture

ACORD released a major update to the Reference Architecture in 2018, consisting of Version 2.7 of the Business Glossary, Information Model, and Data Model. These releases are the result of extensive review and feedback, which helped validate the enhancements. Full details of the updates can be found packaged with each release.

The Business Glossary 2.7 release primarily focused on three major improvements: metadata enhancements for the HTML, CSV, and XML formats; incorporating elements related to new Employee Benefits Standards; and evolving the Glossary by adding 400 new terms.

The key focus of the Information Model 2.7 and Data Model 2.7 releases was the enhancement of structural stability throughout the models. The three main subject areas of the review and improvement process were the Activity Package, Document & Communication Package, and Marketing Package. One primary method used to attain greater structural stability was the elimination of inconsistencies, redundancies, and missing associations or entities.

Forms

Ensuring regulatory compliance is always a primary focus for ACORD Forms, and this continued throughout 2018. This year, we reviewed many of the Forms and revised them to remain consistent with the changing regulatory landscape, as well as ensuring that they were aligned with the current ACORD Data Standards. We also continued to leverage JIRA and Confluence to facilitate member input in our Forms process.

Our Forms PAC was established following the approval of the 2018 Standard Operating Procedures. Three new Standards Project Groups (SPGs) were formed for the Property and Casualty Domain, covering Commercial Marine Hull Application, Commercial Cyber Application, and changes to Certificate 25.

ACORD made 988 changes to our Forms Library, releasing 3 new Forms and 45 revised and enhanced Forms. Changes of note included updates to the Insurance Identification cards of Texas, Arizona and Louisiana; the release of four updated automobile forms in Maryland; and the release of a new ACORD Form for South Carolina: 9 SC South Carolina Required Notice for Insurance Applications.

Digital Standards

In 2018, we brought together all Digital Standards efforts into a single cross-program initiative.

This includes parallel collaborative efforts including an internal Digital Standards Project, donated assets from industry partners, and new Standards Project Groups for Digital Standards and Blockchain.

ACORD's internal Digital Standards project has refined the common principles and approach for defining Digital Standards, along with developing a common approach to modeling and generating API deliverables. It has made significant progress on the first set of use cases, supporting policy amendments for Property & Casualty.

The Digital Standards SPG has initiated efforts to establish a common approach, as well as a framework and implementation guidelines in support of API design leveraging ACORD Data Standards. This SPG will ensure that ACORD APIs conform to a common

approach, across lines of business and geographies wherever possible, to maximize interoperability.

The Digital Standards SPG will also provide subject matter expertise and guidance to ACORD through collaboration on business scenarios, use cases and specifications. It will also assist with the evaluation and testing of Resource Models and RESTful API Specifications.

In addition, the Blockchain SPG will set usage standards for insurance/reinsurance industry Blockchain initiatives, enabling them to operate together effectively. In the short term, the goal is for Reinsurance, P&C and L&A to set standards covering the policy lifecycle and claim processing (including subrogation).

Working with our members, ACORD will continue to set data standards and develop best practices for effectively leveraging these emerging technologies.

Research & Development

ACORD's R&D area completed over 20 reports, studies, articles and thought leadership initiatives in 2018, driven by member needs and interests.

Major releases included two in-depth studies on value creation in the U.S. P&C and Global Life fields. These studies, and the accompanying white papers, were created in order to define metrics for sustainable value creation; highlight the common strategies, capabilities, and characteristics of the companies that achieved it; and identify the key execution imperatives for continued high performance. The studies leveraged in-depth financial analysis, data-driven research, and interviews with industry leaders to uncover these critical best practices across the insurance value chain.

The ACORD U.S. Workers' Compensation Performance Study was released in January, and was a first-of-its-kind review of this \$48 billion market. ACORD examined the top 50 Workers' Compensation writers in the country, segmented them into value categories, analyzed the criteria for success, and identified winning strategies, tactics, and capabilities.

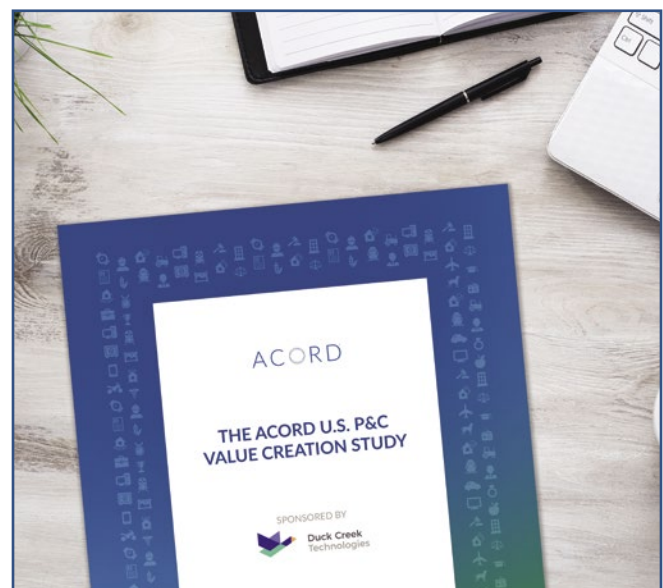

ACORD also released the results of our UK Digital Customer Experience Survey in 2018, rating the online experience delivered by insurance companies in UK personal lines. The study screened over 1000 websites selling personal lines insurance, and used a proprietary

methodology to evaluate the top sites on measurable criteria around user experience, functionality, and underlying strategy.

We also began tracking the proprietary ACORD Global Insurance Stock Index in quarterly updates beginning in Q1 2018. These reports analyze quarterly and annual change in share prices, and provide performance metrics and insights by line of business, geographic region, and company size. The ACORD Index provides a unique and ongoing perspective on the performance of the global insurance market, and the underlying factors behind it.

ACORD also released 2018 updates to a number of ongoing industry research projects, including the ACORD Insurance Digital Maturity Study, gender parity in the insurance workplace, and our Top Ten InsurTech Leaders list.

ACORD research is available to all ACORD members at www.acord.org/research.

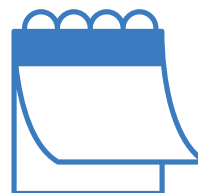

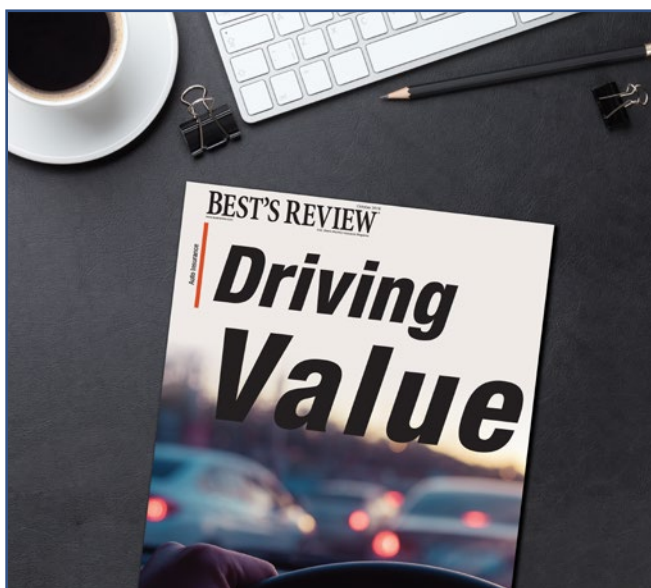

Industry Publications

ACORD partnered with a number of leading industry publications in 2018 to author articles on insurance business and technology. These included:

- “Driving Value: The Characteristics and Strategies of High-Performing Auto Insurers” (*Best’s Review*)
- “Past, Present, and Paradox: The Ups and Downs of Early Adoption” (*Insurance Business America*)
- “A Customer-First Approach to Technology” (*Insurance Day*)
- “Global Winning Strategies” (*InsurTech News*)
- “The Biggest Risk for Most Insurers in 2019” (*Reactions*)

Events

ACORD held its annual flagship event, ACORD Connect, in New Orleans in October. ACORD Connect is the only industry conference which brings together stakeholders from across all roles, geographies, and lines of business to discuss key topics and trends at the intersection of business and technology. Hundreds of members of the ACORD community attended training sessions on the ACORD Standards & Architecture, as well as strategic sessions on current and emerging issues facing the global insurance industry.

ACORD also held the fourth annual ACORD InsurTech Innovation Challenge, the world’s premier event for innovation in insurance technology. Representatives from dozens of hopeful startups pitched their innovations at semi-final rounds in New York, Chicago, and London, with six advancing to the global finals at ACORD Connect. Winners and finalists earned a total of approximately \$150,000 worth of prizes.

For the ACORD Events Calendar and registration information, see www.acord.org/events.

Global Insurance Marketplace Studies

At ACORD's flagship annual event, ACORD Connect, CEO Bill Pieroni presented two keynote sessions showcasing ACORD's 2018 Global Insurance Marketplace Study. This story leveraged ten years of data across 90 countries and more than 8,500 insurers to identify the key factors required for successful execution across multiple distinct types of global markets.

ACORD segmented global insurance markets by insurance GDP penetration and growth, and examined the strategies and differentiating capabilities of high-performing carriers in each type of market. Key questions answered include:

- Which strategy is most often employed by successful insurance companies? Do market types require winners to leverage some strategies more than others?
- What are the capability characteristics of winning carriers – process, organization, and technology?
- What are the “no regret” moves insurance companies can employ regardless of strategic intent?

Results were presented for both the both the P&C and Life markets. Accompanying reports will be published in 2019.

Media Reach

2018 was a record-breaking year at ACORD for media coverage, with 250 million total media impressions globally. Traditional publications, websites, and podcasts all took advantage of the expertise of ACORD's leadership through interviews on a variety of business and technology topics.

PropertyCasualty360.com carried exclusive coverage of the ACORD U.S. Property & Casualty Value Creation Study, including an in-depth video interview with CEO Bill Pieroni. Other topics which generated extensive media interest included the finals of the ACORD InsurTech Innovation Challenge, the annual ACORD Top Ten InsurTech Leaders list, and the launch of collaborative digital platforms built around ACORD Standards.

ACORD also saw a large increase in social media engagement this year, increasing our number of followers by 47% on LinkedIn and Twitter. Join the conversation at:

 [@ACORD_Standards](https://twitter.com/ACORD_Standards)

 [/company/ACORD](https://www.linkedin.com/company/ACORD)

Women in Insurance

ACORD continued to be a prime driver of the Women in Insurance Initiative in 2018. Formed under the auspices of STEMconnector and Million Women Mentors, this consortium is committed to taking substantive action by recruiting, mentoring, and sponsoring women, in order to drive equality in career advancement and leadership industry-wide. Insurance is the first industry to come together as a whole to form an initiative of this kind.

ACORD contributed significantly to the 2018 edition of the *Women in Insurance: Leading to Action* white paper, as well as a number of meetings and conferences where industry leaders came together to discuss the issue of gender parity and develop collaborative plans and best practices to drive meaningful change.

ACORD also launched the Millennial Women's Insurance Advancement Award in 2018, in order to recognize organizations which have made impressive strides in attracting and retaining young women in the insurance industry.

Insurance Industry Charitable Foundation

In 2018, ACORD continued our longstanding participation with the Insurance Industry Charitable Foundation. Over the past 25 years, the IICF has contributed over \$31 million in local community grants, and coordinated more than 300,000 hours of volunteer service at non-profit organizations.

ACORD is proud to contribute each year to the creation of video profiles of grant recipients, which are shown at the annual IICF Northeast Division Benefit Dinner. This year's deserving grantees included The Ana Grace Project, Table to Table, and the Center for Safety and Change. For the second year in a row, ACORD also made donations to the IICF Early Literacy Initiative on behalf of speakers at our annual conference.

To find out how you can donate or volunteer, see www.iicf.org.

Award Sponsorships

ACORD was a proud sponsor of multiple industry awards this year. At the 2018 Insurance Times Awards, ACORD presented the Insurer Innovation of the Year Award, as well as the Best Digital Customer Experience Award. For the second year in a row, the winner of the latter award was selected through research conducted as part of ACORD's Digital Customer Experience Study.

At the 2018 Insurance Day London Market Awards, ACORD presented the awards for Technology Initiative of the Year and InsurTech Initiative of the Year. Judges said the impressive nature of the winners reflected the dynamism of the industry and the commitment to excellence in the insurance community.

2018 ACORD Awards

The ACORD Awards are presented annually to those organizations and individuals who have demonstrated outstanding achievement in ACORD implementation and advocacy. We are proud to recognize the following recipients of ACORD Awards for 2018:
