

RenaissanceRe joins Ruschlikon ePlacing Steering Committee

On a personal note

Introducing Blythe Walker, RenaissanceRe's representative to the ePlacing Community

Blythe Walker, Chief Technology Officer of RenaissanceRe, joined the Ruschlikon ePlacing Steering Committee in November 2025. He looks forward to representing RenaissanceRe and working with fellow members to accelerate the maturity, adoption, and global implementation of a unified digital placing standard.

RenaissanceRe has been a longstanding promoter of ePlacement modernisation, recognizing the challenges of managing a complex supply chain via numerous broker platforms. As part of this, Blythe

helped drive early collaboration with an initial cohort of brokers to develop standardised ePlacement APIs and subsequently championed ACORD-based digital placement initiatives within the Bermuda market.

With more than twenty years of experience delivering innovative, high-impact solutions across both the front and back office, Blythe brings deep technical and operational expertise to the Ruschlikon community.

Blythe looks forward to advancing digital placement across the (re)insurance industry while also expanding RenaissanceRe's ePlacing capabilities in alignment with Ruschlikon standards.

"The (re)insurance industry can benefit greatly from a more digital supply chain, unlocking the potential for better risk analysis, increased efficiency, and more effective portfolio management across the market."

- Blythe Walker, Chief Technology Officer, RenaissanceRe
